old URL: [Genshin Impact Promotion \(tingrui98.github.io\)](https://tingrui98.github.io/Genshin%20Impact%20Promotion/)

new URL: [Genshin Impact Promotion \(masontren2.github.io\)](https://masontren2.github.io/Genshin%20Impact%20Promotion/)

Weakness # 1:

Welcome to Genshin Impact

Low physical effort principle. You Need organization structure to your site. A good hierarchy can reduce the cost of reaching the content.

Weakness # 2:

Character Information

 Character Image
Character Name

You **need to add enough clues to keep users from looking for something extra.**

Weakness 3:

Feedback

asdasd

Command interaction on caps locking issues

Weakness 4:

Subscribe to Updates

Enter your email

Command interaction regarding default cursor position issues to avoid frequent switching between mouse and keyboard

Weakness # 5:

Character Information

 Character Image
Character Name

Response issues of Norman about image. Deliberate violation

Weakness # 6:

Kaveh

[< Previous](#) [Next >](#)

flexibility in use principle of universal design.

Weakness # 7:

Welcome to Genshin Impact

Game Trailer

Novice problem of human error

For weakness 1:

Welcome to Genshin Impact

I added tab in dialog box section. When you click on any tab, you will be brought to the corresponding location. At the same time, the color format of the tab will change, which lets the user know that you are here.

For weakness 2:

Character Information

Add a search engine to the character introduction module, which makes it easy for users to find the character they want to know directly.

For weakness 3:

Feedback

Asdasd

In the feedback module, I provide caps locking. When users type text, they do not have to switch to uppercase mode through the keyboard. The text box starts with uppercase by default. At the same time, in the next sentence after entering a period, the first letter capitalization also applies.

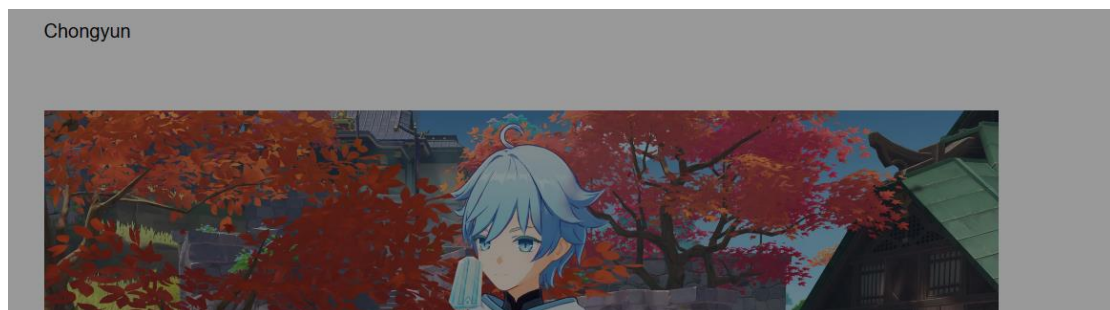

For Weakness 4:

Subscribe to Updates

Enter your email

When the user reaches the feedback module or subscription module through the navigation bar, the cursor will automatically appear in the text box, which will reduce the user's mouse and keyboard switching.

For weakness 5:

By default, the first chapter image shows the role information of the heavy cloud, which is a way of direct operation, even feedback, which avoids the user's repeated operations in order to load the image.

For Weakness 6:

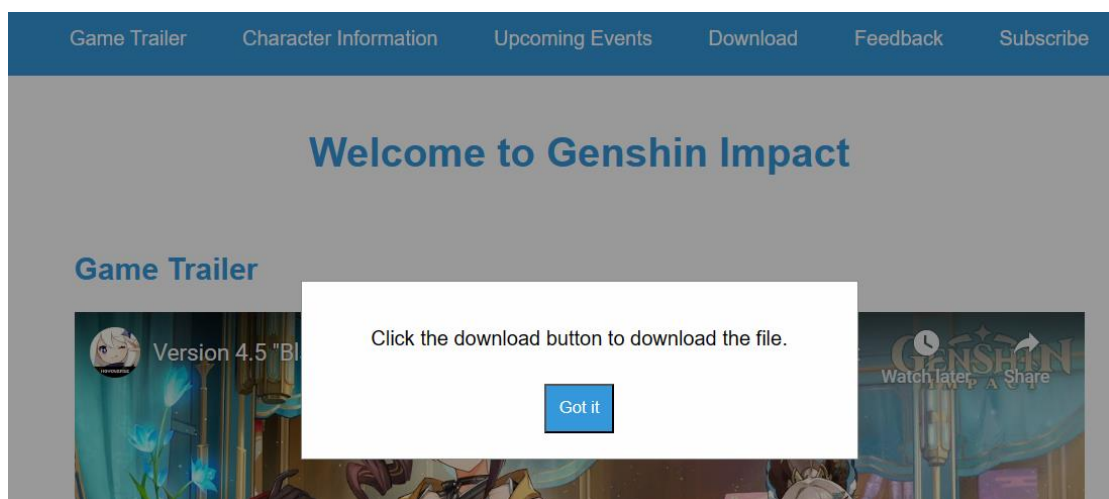

Character Information

Chongyun

Users can either view the character through the next key or search the character directly through the search box

For weakness 7:

Provide a user guide. When you log in to the page for the first time, the novice guide is displayed. At the same time, the guide is about the core problem of the website - the

download module, which can help users to download the module directly to avoid wasting time.
